

COURSE OVERVIEW & DESCRIPTION

The qualification is design to ensure specialist competence in all the disciplines related to film and television production, including camera, lighting, vision control, vision mixing, editing, recording, sound and captioning competence, with the elective component allowing for this specialisation. Although qualifying learners are not able to make creative choices, they are capable of working under direction, and to specification, making suggestions to those with creative decision making powers.

COURSE MODULE OUTCOMES

- > Organising and managing information about film or television production activities according to specified requirements.
- > Determining film or television resource requirements for specific production processes.
- > Planning film or television production activities to meet given requirements.
- > Assessing film or television production processes against given quality requirements.
- > Implementing film or television production processes as directed within an area of specialisation.
- > Controlling film or television operations according to specified business principles.
